**IBN SINA AND HIS CONTRIBUTION TO SPIRITUAL AND MORAL EDUCATION:
RETHINKING THE HERITAGE OF EASTERN THINKERS**

Abstract. The article examines the relevance of spiritual and moral education in modern society, especially in conditions of moral crisis and geopolitical problems. The author emphasizes the importance of a harmonious combination of national and universal values in creating a new model of the educational process. Special attention is paid to the study of the heritage of thinkers of the past, in particular, the contribution of Ibn Sina, an outstanding thinker of the East. Ibn Sina presented education as a complex process, including mental, physical, aesthetic and moral development. His ethical ideas, especially in the field of morality and friendship, can be valuable for modern teachers and specialists in the field of spiritual and moral education. The article calls for rethinking and using the heritage of Eastern thinkers in the process of raising children and adolescents, as well as in the professional training of future teachers.

Keywords: education, national and universal values, education, morality, youth, Ibn Sina, aesthetics, ethics.

**ИБН СИНА И ЕГО ВКЛАД В ДУХОВНО-НРАВСТВЕННОЕ ВОСПИТАНИЕ:
ПЕРЕОСМЫСЛЕНИЕ НАСЛЕДИЯ ВОСТОЧНЫХ МЫСЛИТЕЛЕЙ**

Аннотация. В статье рассматривается актуальность духовно-нравственного воспитания в современном обществе, особенно в условиях морального кризиса и геополитических проблем. Автор подчеркивает важность гармоничного сочетания национальных и общечеловеческих ценностей в создании новой модели образовательного процесса. Особое внимание уделено изучению наследия мыслителей прошлого, в частности, вклада выдающегося мыслителя Востока Ибн Сины. Ибн Сина представил образование как сложный процесс, включающий умственное, физическое, эстетическое и нравственное развитие. Его этические идеи, особенно в области нравственности и дружбы, могут быть ценные для современных педагогов и специалистов в области духовно-нравственного воспитания. Статья призывает к переосмыслинию и использованию наследия восточных мыслителей в процессе воспитания детей и подростков, а также в профессиональной подготовке будущих учителей.

Ключевые слова: образование, национальные и общечеловеческие ценности, образование, мораль, молодежь, Ибн Сина, эстетика, этика.

**IBN SINO VA UNING MA'NAVIY-AXLOQIY TARBIYAGA QO'SHGAN HISSASI: SHARQ
MUTAFAKKIRLARI MEROSINI QAYTA KO'RIB CHIQISH**

Annotatsiya. Maqolada ma'naviy-axloqiy tarbiyaning zamонавијија jamiyatda, ayniqsa ma'naviy inqiroz va geosiyosiy muammolar sharoitida dolzarbligi ko'rib chiqiladi. Muallif ta'lim jarayonining yangi modelini yaratishda milliy va umuminsoniy qadriyatlarning uyg'unligi muhimligini ta'kidlaydi. O'tmish mutafakkirlari merosini, xususan, Sharqning atoqli mutafakkiri Ibn Sino hissasini o'rganishga alohida e'tibor qaratilgan. Ibn Sino ta'lim-tarbiyani aqliy, jismoniy, estetik va axloqiy rivojlanishni o'z ichiga olgan murakkab jarayon sifatida

ko'rsatdi. Uning axloqiy g'oyalari, ayniqsa, odob-axloq va do'stlik haqidagi ma'naviy-axloqiy tarbiya sohasidagi zamonaviy o'qituvchi va mutaxassislar uchun qimmatlidir. Maqolada Sharq mutafakkirlari merosidan bolalar va o'smirlar tarbiyasi, bo'lajak o'qituvchilarni kasbiy tayyorgarligi jarayonida qayta ko'rib chiqish va foydalanishga chaqiriladi.

Kalit so'zlar: tarbiya, milliy va umuminsoniy qadriyatlar, ta'lim, axloq, yoshlar, Ibn Sino, estetika, axloq.

Introduction. Education, fundamentally, serves as the tangible manifestation of societal ideals and stands as a paramount requisite for the welfare of the state. Within the milieu of a burgeoning global moral crisis, shifting state ideologies, and prevailing geopolitical challenges, the imperative of adequately preparing the younger generation for adulthood assumes a fundamental significance, commensurate with the urgency of addressing public safety concerns.

The accumulation of knowledge across various historical epochs by representatives from diverse fields of humanities advocates for a synergistic approach in addressing the delineation of educational content, particularly concerning spiritual and moral education. Within the framework of this approach, the development of a novel educational paradigm that aligns with contemporary sociocultural demands necessitates a harmonious integration of national and universal values, alongside the traditions of indigenous pedagogical schools and contemporary educational advancements.

In light of these principles, a comprehensive and multidimensional examination of the scholarly and spiritual legacy left by past thinkers assumes significance. Within the realm of spiritual and moral education, morality emerges as a pivotal concept, the interpretation of which is subject to the influence of various societal factors. Notions surrounding morality underpin ethical doctrines, thereby shaping the conceptualization of education.

Literature review. Efforts are currently underway within our nation to reassess and extensively reform the system of spiritual and moral education for the youth. Among its focal points is the exploration of the legacy of Eastern philosophers, not solely for scholarly pursuits but also for educational objectives. Considering the societal demands and developmental prospects, we prioritize the works of scholars from the Eastern Renaissance era. This epoch was characterized by eminent polymaths such as Khwarizmi, Farabi, Ibn Sina, Beruni, and others, renowned for their vast contributions to knowledge and wisdom.

During that era, Ibn Sina, a prominent intellectual, significantly advanced the fields of natural science and progressive socio-philosophical studies, earning the esteemed title of "Shaykhur-raisi" (head of scientists) as a testament to his exceptional contributions.

Ibn Sina considered the process of education as a single one, including mental, physical, aesthetic and moral education. In addition, he gave a philosophical interpretation of such concepts as good and evil, modesty, will, but problems of morality occupy a special place in his work. In his work "The Canon of Morals," he analyzed in detail the key terms and concepts of his ethical teaching. His system of ideas about ethics, as scientists note, "has little in common with Aristotelian psychology (which, however, Ibn Sina did not deny), and the theory of intuitive grasp of the subject of knowledge can cause associations with Sufism" [1]. However, Ibn Sina's ethical ideas are of interest not only to philosophers or theoretical researchers. The legacy of the great scientist can be fully used both for the spiritual and moral education of

children and adolescents, and in the process of professional training of future teachers. The relevance of Ibn Sina's judgments is confirmed, in particular, by the quotation below:

"Beware of being greedy and, while maintaining honor, do not demand more from fate than you have. Know that greed awakens a destructive passion in us, And whoever is engulfed by it is easy to perish" [2].

Avicenna's in-depth analysis of the reasons for the emergence of negative and positive qualities in the general traits of a person's character is also valuable for teachers. Ibn Sina considered, for example, friendship to be an important aspect of the manifestation of a person's ethical qualities. As B. Turaev notes, "Ibn Sina identified 3 types of friendship: firstly, no matter how difficult it is, a person tries not to leave his friend; secondly, ideological friendship, that is, friendship between people who have common interests; thirdly, it is friendship that arises out of profit and benefit." "Don't strive for friendship with everyone you meet, And don't trust secrets to just anyone, They are liars, stay away from scoundrels, Otherwise you will harm yourself in the least."

The "Canon of Morals" contains many rules that allow young people to successfully enter society and build correct relationships with others:

"And do not submit to the will of a scoundrel, Do not exceed the permitted limit, If you tarnish your honor, do not blame yourself, Just as you do not shed tears, there will be no faith in your tears." [3].

The relationship between the categories of good and evil, their manifestations and consequences of manifestation in everyday reality is also the object of close study by Ibn Sina:

"You, who left a stamp on the world of villainy,
You ask for grace to descend on you.
Don't hope: there will be no forgiveness forever,
For he who sows evil must reap evil."

Discussion. Speaking about the dignity of a person, Ibn Sina states that "for a person, one of the main qualities from which his dignity begins is undoubtedly the elimination of his bad qualities, since worthy behavior of a person is the simplest quality among the good qualities of a person, a special place among which is occupied by care and attention..." [4].

It is noteworthy that the ethical concepts of the scholar were not artificially segregated from broader social realities. Within Avicenna's works, moral considerations are intricately interwoven with aesthetic perspectives: according to Ibn Sina, every human aspiration embodies a pursuit of beauty fueled by love, with beauty equated to perfection in his view.

Ibn Sina's depiction of humanity as the apex of physical and organic evolution, coupled with his assertion of human potential for rapid advancement towards perfection and beauty, attests to the profound humanism underlying his philosophy. The conceptual frameworks for the expression and cultivation of moral virtues elucidated by the eminent Eastern thinker, alongside the ethical principles he delineated, retain their relevance today. Consequently, they hold promise for effective integration into contemporary educational frameworks and pedagogical practices.

Education is a process of regular and purposeful influence on a person, on his spiritual and physical formation, in order to prepare him for industrial, social and civilized activities. Education is not a separate process; it is inextricably linked with training and formation, since these processes are aimed at the individual as a whole. In the areas of education, it is quite

difficult to determine some components that affect feelings, will, character, value orientations and mental abilities. It should also be noted that there are differences in the processes of education and formation. If we compare it with education, where the main goal is the formation of the individual's cognitive processes, his abilities, and his assimilation of information, education sets the goal of developing the individual as a person, his relationship to the environment and connections with it.

Education represents a vital social institution, constituting one of the foundational elements of societal structure. The educational content mirrors the prevailing societal conditions, delineating the transition from one societal paradigm to another. Presently, this transition encompasses the shift from the industrial society of the 20th century towards the post-industrial or information-based society of the 21st century. The development and operation of education are contingent upon a myriad of societal factors and circumstances, encompassing economic, political, social, and cultural dimensions, among others. Concurrently, the overarching aim of education lies in fostering the holistic development of individuals aligned with the societal demands of their respective milieu, as reflected in both education and culture.

Within the sphere of education and upbringing, a primary imperative is the instillation of our nation's core values into the consciousness of the younger generation.

Abu Ali Ibn Sina, a great scientist of Central Asia, was born in the village of Afshana, near Bukhara. He wrote his first scientific work at the age of 17. The scientific heritage of Ibn Sina is enormous, covering all areas of human knowledge of that time. His works are used not only in Central Asia, but also in European countries. In the field of education, Ibn Sina created such works as "The Book of Justice", "Canon of Duty", "Management of Body and Thought", "Canons of Morality" and others.

Ibn Sina, in his work "The Canon of Morals," revealed the reasons for the emergence of negative and positive qualities in the general traits of a person's character. The scientist in this work points out that positive and negative qualities appear from habit and under the influence of state nobility. Ibn Sina in his works explains such concepts as: justice, generosity, patience, responsibility, loyalty, composure, modesty and other qualities. A learned man, he believed, should be honest in all respects and treat others in a polite manner. He considered it especially important to renounce the pleasures of life in favour of oneself. Gives an explanation for such positive qualities as justice, cleanliness and also reveals negative shortcomings such as fear, hypocrisy, stinginess, theft, fraud.

Ibn Sina in his works pays special attention to friendliness and responsiveness between people, believing that baseness prevents people from being friends. His works reveal such concepts as being kind to friends, not sparing help, and not turning away from the shortcomings of your friends and helping them get rid of them. Based on the educational program, Ibn Sina identified 3 types of friendship: firstly, no matter how difficult it is, a person tries not to leave his friend; secondly, ideological friendship, that is, friendship between people who have common interests; thirdly, it is friendship that arises out of profit and benefit [5].

Results. A scientist compares a true friend to a mirror because a mirror shows a person's real reality. If a person does not reveal the shortcomings of his friend in time, this means that he has forgotten his duty as a friend, which means that we must teach students to choose real friends, appreciate them and point out mistakes in time. Why is it necessary to

conduct educational conversations between students on the topic: "Strengthening friendship and how to be frank towards friends" [6], dwelling in more detail on Ibn Sina's statements about friendliness, kindness, and philanthropy.

He demanded from the teacher: "When dealing with children, the teacher must be restrained. He must pay special attention to how students implement the acquired knowledge. In the learning process, the scientist believed, it is necessary to use a variety of methods and forms of work with children, take into account their individual characteristics, and interest them in activities. The teacher's thoughts should be accessible to all students. He must accompany his words with facial expressions and gestures so that the learning is more intelligible and evokes an emotional attitude in children" [7]. All these thoughts of Ibn Sina fundamentally contradicted the prevailing teaching methods in schools of that time. Ibn

Sina deeply understood the complexities and difficulties of the education process. An analysis of his works convinces us that he proposed to resolve them from a humanistic position, and gives advice on how to talk to children about their shortcomings and ways to correct them. "... Such conversations should not be intrusive, bother the child, much less hurt his pride. You can talk to a child only if you know his individuality." [8].

Conclusion. An interesting summary of Ibn Sina's ethical and sociological views can be read in the final part of his philosophical encyclopaedia "Kitob-ash-Shifo". Where he develops the idea that man is a social being and therefore the most important condition for people's lives is their constant cooperation, ensured by reasonable laws and justice. Ibn Sina paints an ideal state with a just ruler who makes sure that everyone is engaged in socially useful work. "If the ruler is unjust, rebellion against him is justified and should be supported by society" [9].

Thus, in the development of youth as individuals, the following is important:

- studying the concepts of national values and their transmission in the form of accessible information;
- revealing in young people a sense of patriotism, love for the Motherland and struggle for it;
- in the education of youth, use and explain such concepts as the perfect generation, personality, scientist, sage, activist, intellectual and others.

Therefore, enhancing the intellectual development of the youth today requires prioritizing the integration of our national spiritual heritage, instilling a sense of pride and patriotism. This endeavor holds immense significance as it fosters respect, moral integrity, generosity, and other essential virtues among young individuals. Guiding the upbringing of the younger generation is a dynamic process that relies on various cultural, social, material, and organizational approaches.
